

BANDYAGA ADIANSYAH SUGANDI

+6289507130037 | bandyagaadiansyah@gmail.com | https://www.linkedin.com/in/bandyagaadiansyah/

An Informatics Engineering graduate with practical experience in developing web and mobile applications, with a strong focus on frontend technologies, eager to leverage my skills in creating effective digital solutions Experienced in full-stack development, including API integration, UI/UX design, and software testing, with a proven ability to manage databases efficiently. Proficient in collaborating with diverse teams to tackle challenges and quickly adapt to new technologies, aiming to contribute to innovative projects.

Work Experiences

PT Neural Technologies Indonesia - **South Jakarta** Jul 2025 - Oct 2025

Intern Frontend Engineer

- Developed responsive web interfaces from Figma designs using React.js and TypeScript, implementing modular and reusable components with Material UI and Ant Design.
- Integrated REST APIs and managed application state and server-side data fetching to deliver dynamic, data-driven dashboards.
- Improved UI designs and refactored existing code to enhance usability, maintainability, and code quality while implementing data visualizations, tables, and map-based components.
- Deployed web dashboards through Telegram bot workflows and Termius, supporting deployment processes in the development environment.

Education Level

Politeknik Negeri Bandung - **Bandung** Aug 2023 - Aug 2026

Associate of Informatics and Computer Engineering, 3.61/4.00

SMAN 1 Majalengka - **Majalengka** Jul 2019 - May 2022

Senior High School, Mathematics and Science, 92.26/100.00

Organisational Experience

Himpunan Mahasiswa Komputer - Politeknik Negeri Bandung Jan 2024 - Dec 2025

Head of Esports Divison at Departemen Seni dan Olahraga

Skills, Achievements & Other Experience

- **Arutala Lab Certified Junior Software Tester** (2026)
- **TOEIC Certification** (2026)
- **Wadhwani Foundation Job Ready: Employability Skills** (2025)
- **Binar Academy Frontend Engineering** (2023)
- **Binar Car Rental** (2023): Developed a web-based car rental application as part of the Binar Academy bootcamp, applying React.js to build interactive user interfaces and implement car rental features while strengthening frontend development skills.
- **RSA Encryption CLI Application** (2024): Developed a command-line application in C++ that implements the RSA public-key cryptographic algorithm to demonstrate data encryption and decryption, applying fundamental programming concepts and cryptographic principles.
- **Mosque Activity Management System** (2024): Developed a web-based mosque activity management application using PHP, Laravel, and PostgreSQL to organize activity information, manage related records, and support administrative tasks through a centralized system.
- **Foolens - Food Allergen Detection App** (2025): Developed a mobile food allergen detection application using Kotlin and Google Machine Learning Kit, supported by a Laravel-based web administration system, to help users identify potential food allergens and enable administrators to manage application data and related information.
- **Yayasan Sekar Telkom Accounting Information System** (2026): Developed a web-based accounting information system for Yayasan Sekar Telkom as a college final project using Next.js, NestJS, and PostgreSQL within a Turborepo-managed monorepo. The application supports financial transaction recording, general ledger management, accounting period control, and financial reporting in accordance with ISAK 335 for nonprofit entities.
- **School Report Management CLI** (2024): Developed a command-line school report management application using C++ to organize student academic records and grades, applying fundamental programming concepts and structured data processing to manage student report information.
- **Mobile Top-Up CLI** (2023): Developed a command-line application using C to simulate mobile credit and prepaid electricity token purchases through a text-based interface, applying fundamental programming logic and transaction processing concepts.

- **Look[a]Like - Face Analysis Application** (2025): Developed an interactive face analysis application using Python and Streamlit, featuring face recognition, facial similarity comparison, and age estimation through a web-based interface that presents facial analysis results.
- **Tifosi - Formula 1 Data Application**: Developed Tifosi, a web-based Formula 1 application designed to provide fans with an interactive platform for exploring Formula 1 information, racing statistics, and driver and team performance. The application presents motorsport data through an organized user interface, making it easier for users to discover relevant racing information and explore different aspects of the Formula 1 championship.
- **Hard Skills**: Frontend Development, Backend Development, Object Oriented Programming, UI/UX Design, Database Management, Software Testing
- **Soft Skills**: Collaboration, Teamwork, Communication, Problem Solving, Adaptable
- **Programming Tech Experience**: HTML, CSS, JavaScript, TypeScript, C, C++, PHP, Python, Java, Kotlin, Node.js. React.js, Next.js, Nest.js Laravel, MySQL, PostgreSQL
- **Programming Tools Experience**: Visual Studio Code, Android Studio, Git Version Control, Figma, Postman API, Swagger API Mockoon, Mapbox
